# PROBLEM

## 60 infected people per day... “slow death” stalks cancer patients in Tunisia

October 29, 2024 by [world today news](#)

- Maryam, 38, mother of four from a financially weak family in Kasserine, Tunisia, was shocked to learn she had cancer 2 years ago.
- Her treatment journey was harder than the illness itself, marked by long waits and limited resources.
- Over 22,000 new cases in 2023 in Tunisia lack of sufficient medical resources, delayed treatments, and financial burdens.

# STATUS QUO

Over \$2.6 Billion & 10–15 years are needed to bring a single drug to market.

“One-size-fits-all” drug testing ignores unique genetic and lifestyle differences.

90% of drugs fail in clinical trials

Ethical concerns and human risks plague early-stage drug testing.

Patient data is fragmented and insecure, compromising trust and slowing progress.

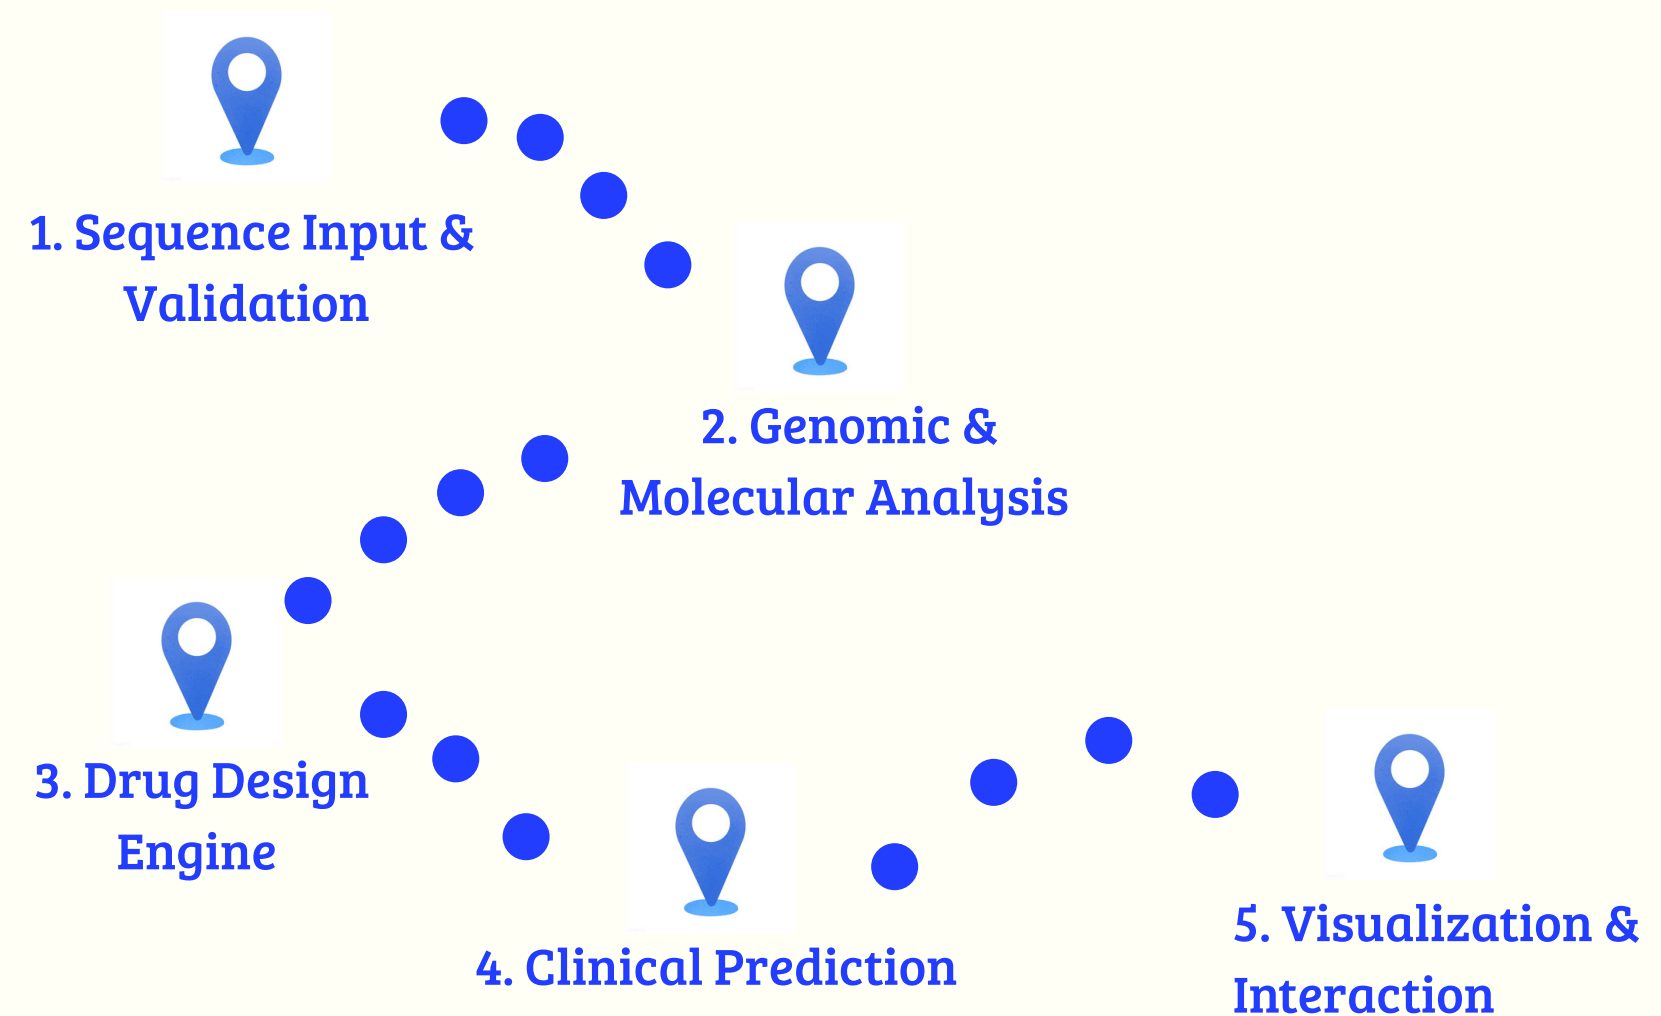

TwinCure.AI

# SOLUTION: NEW ERA IN DRUG TESTING

A digital replica of an individual, integrating their genetic, physiological, and lifestyle data to simulate drug responses before real-world trials.

**AI-Powered Digital  
Twins Secured by  
Blockchain**

Process: From DNA to Digital Twin & Drug Design

# TECHNICAL OVERVIEW

**1** Our solution leverages AI-driven optimization to accelerate personalized drug design, utilizing:

- Machine Learning Models (Random Forest)
- → Predict clinical markers based on DNA sequences.

**Mathematical Optimization:**

$$\min f(x) = w_1 \cdot \text{Binding Affinity} + w_2 \cdot \text{Specificity Loss} + w_3 \cdot \text{Instability} + w_4 \cdot \text{Delivery Penalty}$$

where  $w_1, w_2, w_3, w_4$  are weights (e.g., [0.4, 0.3, 0.2, 0.1]) that reflect therapeutic priorities.

# BUSINESS MODEL

## Business Type

- B2B AI-as-a-Service (AIaaS)
- a cutting-edge AI startup delivering advanced solutions in biotech and personalized medicine
- offering enterprise-grade services to pharmaceutical companies, biotech firms, research labs, and health regulators.

## Pricing

- Project-Based Contracts
- SaaS Licensing
  - Starter for labs – \$299/month
  - Custom pricing for enterprises
- Implement Hybrid Blockchain infrastructure.
- Data Tokenization
  - Monetization through tokenized simulation data in secure marketplaces.
